

# EDUARDO CARIDE SATO

## SENIOR NETSUITE DEVELOPER

Montevideo, Uruguay | 056 1122 | EduardoCaride@gmail.com

### PROFESSIONAL SUMMARY

Senior NetSuite and enterprise applications developer with 10+ years of experience across ERP customization, software development, systems analysis, integrations, and financial process support. Experienced in SuiteScript 1.0, 2.0, and 2.1, SuiteCloud Development Framework (SDF), workflow automation, reporting, and integration platforms including Celigo, Workato, and MuleSoft. Combines a background in economics and data science with hands-on technical delivery to build reliable systems that improve operational speed, data accuracy, and scalability.

### PROFESSIONAL EXPERIENCE

#### Senior NetSuite Developer

Apr 2023 - Present

NetCommerce | Montevideo, Uruguay / Remote

- Design and deliver NetSuite customizations using SuiteScript 2.0/2.1, including Suitelets, RESTlets, User Event, Client, Scheduled, and Map/Reduce scripts.
- Automate ERP workflows, approvals, validations, reporting, and data-entry processes to reduce manual work and improve transaction accuracy.
- Build and support integrations between NetSuite and external platforms using Celigo, Workato, MuleSoft, and REST/SOAP APIs.
- Use SDF and controlled deployment practices to manage custom objects, scripts, configuration changes, testing, and releases across environments.
- Partner with finance, operations, and business stakeholders to translate requirements into scalable technical solutions and resolve production issues.
- Review script governance, search logic, and processing design to improve performance, reliability, and maintainability.

#### Oracle E-Business Suite Developer

Aug 2020 - Mar 2023

FlairsTech | Remote

- Developed and maintained Oracle E-Business Suite extensions, interfaces, reports, and data-processing routines for enterprise business teams.
- Created SQL-based solutions for data extraction, validation, reconciliation, and operational reporting.
- Supported system integrations, data migration activities, user acceptance testing, deployment preparation, and post-release troubleshooting.
- Worked with functional analysts and end users to investigate defects, clarify requirements, and improve finance and operational processes.

#### Software Developer

Apr 2019 - Jul 2020

FlairsTech | Remote

- Developed and enhanced web applications, APIs, and internal tools using modern JavaScript, React-based technologies, SQL, and cloud services.
- Participated in requirements analysis, technical design, code review, testing, deployment, and production support within an Agile delivery model.

Financial workflows  
Reconciliation and controls  
Process analysis

### DELIVERY

Azure services  
Sandbox testing  
Production support  
Stakeholder communication

### LANGUAGES

English  
Spanish

### CERTIFICATIONS

SuiteCloud Developer II  
January 2021

SuiteFoundation  
April 2017

### EDUCATION

Universidad ORT Uruguay  
Bachelor Degree in Economics  
and Data Science  
2010

Software Developer (continued)

- Improved application reliability by troubleshooting defects, validating data flows, and documenting reusable technical solutions.

PROFESSIONAL EXPERIENCE (CONTINUED)

Software Developer / IT Analyst

Tata Consultancy Services | Montevideo, Uruguay

Jan 2017 - Mar 2019

- Analyzed business and system requirements and converted them into maintainable application enhancements and support solutions.
- Developed integrations, data-processing routines, SQL queries, and automation utilities for enterprise clients.
- Coordinated testing, incident resolution, documentation, and production releases with technical and business teams.
- Provided application support and root-cause analysis for data, workflow, and system performance issues.

Junior Software Developer

Tata Consultancy Services | Montevideo, Uruguay

Aug 2014 - Dec 2016

- Supported the development, testing, debugging, and maintenance of enterprise software applications.
- Prepared technical documentation, assisted with data validation, and resolved assigned defects under senior developer guidance.
- Built a strong foundation in structured software delivery, client support, SQL, and enterprise application environments.

Financial Analyst Intern (Part-Time, Non-Paid)

Clinixon - Startup Company | Montevideo, Uruguay

Nov 2011 - Apr 2014

- Created financial models reflecting the company operating position, growth assumptions, and future expansion timeline.
- Collaborated with the founders to update projections as business plans, timing, and operating assumptions changed.
- Researched potential tax structures and summarized considerations for the company owner and leadership team.
- Applied economics, data analysis, and scenario planning to support early-stage business decisions.
